(54) Title: SNOW-TYPE BIKE

(57) Abstract

A board bike has a frame (50) supporting a saddle (61) and a steering mechanism (54 - 57) that steers a forward ski member (72). The frame (50) is mounted to a rear ski member (67) and the frame carries a pair of footrests (62). The rear ski member and, preferably the front ski member (72), have substantially the same width as the overall width of the footrests. The handlebars are, preferably, shaped to accommodate a drag lift poma or other tow lift.
